New Updated AZ-202 Exam Questions from PassLeader AZ-202 PDF dumps! Welcome to download the newest PassLeader AZ-202 VCE dumps: https://www.passleader.com/az-202.html (150 Q&As) Keywords: AZ-202 exam dumps, AZ-202 exam questions, AZ-202 VCE dumps, AZ-202 PDF dumps, AZ-202 practice tests, AZ-202 study guide, AZ-202 braindumps, Microsoft Azure Developer Certification Transition Exam P.S. New AZ-202 dumps PDF: https://drive.google.com/open?id=1q16fluansPX6oRsh6xCyVACMIbBIzUIU P.S. New AZ-203 dumps PDF: https://drive.google.com/open?id=1jey9nt3_9Hc8i_iXXXps52RXsEo3gi5u NEW QUESTION 1A company is migrating an existing on-premises third-party website to Azure. The website is stateless. The company does not have access to the source code for the website. They do have the original installer. The number of visitors at the website vanes throughout the year. The on-premises infrastructure was resized to accommodate peaks but the extra capacity was not used. You need to implement a virtual machine scale set instance. What should you do? A. Use only default diagnostics metrics to trigger autoscaling.B. Create 100 autoscale settings per resource.C. Scale out by one instance when the average CPU usage of one of the instances is over 80 percent.D. Use Azure Monitor to create autoscale settings using custom metrics. Answer: DExplanation:Azure Monitor autoscaling allows you to scale the number of running instances up or down, based on telemetry data (metrics). https://docs.microsoft.com/en-us/azure/azure-monitor/platform/autoscale-common-metrics NEW QUESTION 2You are developing an Azure Durable Function instance. You need to add a delay by using a durable timer. What type of function should you use? A. WebhookB. OrchestratorC. ClientD. Activity Answer: BExplanation:Durable Functions provides durable timers for use in orchestrator functions to implement delays or to set up timeouts on async actions. https://docs.microsoft.com/en-us/azure/azure-functions/durable/durable-functions-overview NEW QUESTION 3Members of the finance department for a company review and make changes to a Microsoft Excel workbook that is hosted on OneDrive. The workbook contains projected costs and revenue for a project. You need to develop an Azure Function that ingests data from the modified workbook and places it into a Microsoft Word document. Which two objects should you implement? (Each correct answer presents part of the solution. Choose two.) A. An Excel table input bindingB. An auth token input bindingC. An Excel table output bindingD. A group subscriptionE. A group conversation subscription Answer: ADExplanation:Azure Functions supports trigger, input, and output bindings for external files. These bindings create API connections to SaaS providers, or use existing API connections from your Function App's resource group. https://docs.microsoft.com/en-us/azure/azure-functions/functions-bindings-external-file NEW QUESTION 4You are creating an loT solution using Azure Time Series Insight. You configure the environment to ensure that all data for the current year is available What should you do? A. Change the pricing tier.B. Add a disaster recovery (DR) strategy.C. Set a value for the Data Retention time setting.D. A reference data. Answer: CExplanation:The data is retained in Time Series Insights based on the selected retention days or maximum limits. Retention is configurable in the Azure portal. The longest allowable retention period is a rolling year of 12 months + 1 month, which is defined as 400 days.https://azure.microsoft.com/en-us/pricing/details/time-series-insights/ NEW QUESTION 5You develop a serverless application using several Azure Functions. These functions connect to data from within the code. You want to configure tracing for an Azure Function App project. You need to change configuration settings in the host.json file. Which tool should you use? A. Azure PortalB. Azure PowerShellC. Azure Functions Core ToolsD. Visual Studio Answer: C NEW QUESTION 6You develop an app that processes data packages that are less than 10 KB. The solution processes and then deletes the data packages. Data must be processed by only one instance and must persist if the app is reset but not after it is processed. You need to select a storage technology for the solution while minimizing costs. Which data storage service should you use? A. Azure Table StorageB. Azure Queue StorageC. Azure Blob StorageD. Azure Redis CacheE. Azure SQL Database Answer: C NEW QUESTION 7You are developing a project management service by using ASP.NET. The service hosts conversations, files, to-do lists, and a calendar that users can interact with at any time. The application uses Azure Search for allowing users to search for keywords in the project data. You need to implement code that creates the object which is used to create indexes in the Azure Search service. Which two objects should you use? (Each correct answer presents part of the solution. Choose two.) A. SearchServiceB. SearchlndexCIientC. SearchServiceClientD. SearchCredentials Answer: CD NEW QUESTION 8 You are a developer for a SaaS company that offers many web services. All web services for the company must meet the following requirements:- Use API Management to access the services- Use OpenID Connect for authentication- Prevent anonymous usageA recent security audit found that several web services can be called without any authentication. Which API Management policy should you implement? A. validate-jwtB. authentication-certificateC. check-headerD. jsonp Answer: B NEW QUESTION 9

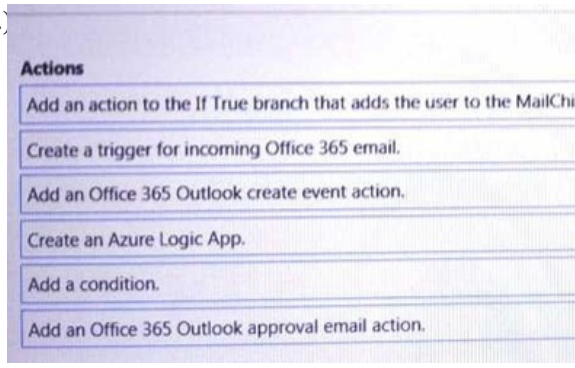

HotSpotYou are developing a solution that requires serverless code execution in Azure. The solution has two functions that must run in a specific order. You need to ensure that the second function can use the output from the first function. How should you complete the code? (To answer, select the appropriate options in the answer area.)

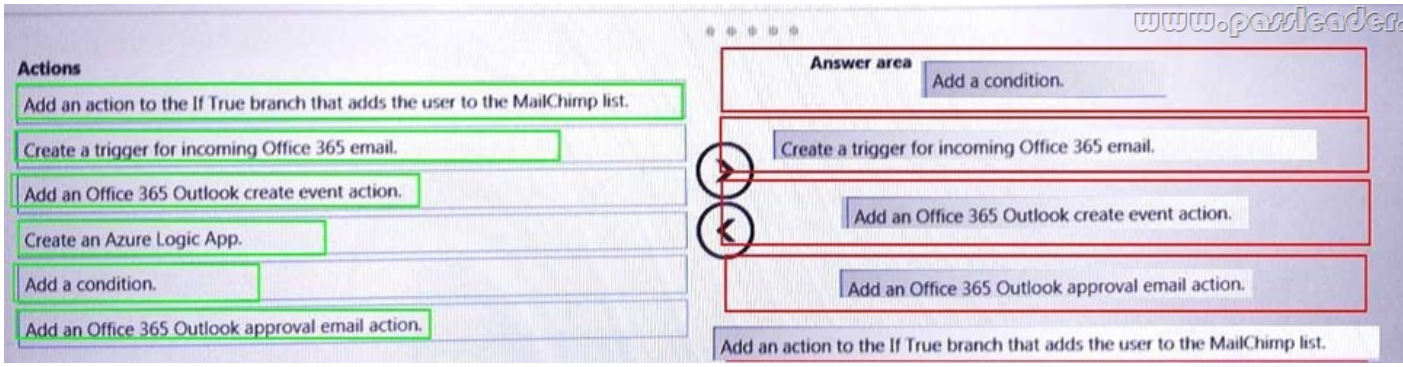

Answer:

NEW QUESTION 10Drag and DropYou develop cloud solutions an organization. The organization creates a mailing list for each new project that is announced to the public. You add users manually to a Mail Chimp list when a request email is sent to a community manager's Microsoft Office 365 email account. You need to automate the process of adding new users to the Mail Chimp list by using an Azure Logic App. Which five actions should you perform in sequence? (To answer, move the appropriate actions form the list of actions to the answer area and arrange them in the correct order.)

Answer:

Case Study 1 - Litware, Inc.You are a developer for Litware, Inc., which is a SaaS company that provides a solution for managing employee expenses. The solution consists of an ASP.NET Core Web API project that is deployed as an Azure Web App..... NEW QUESTION 111You need to resolve the log capacity issue. What should you do? A.
