New AZ-400 dumps PDF: https://drive.google.com/open?id=1L7kKrrFiEOHT2sXpAOJyL21YYGtCNOUZ NEW QUESTION 130Your company has an Azure subscription that contains the following unused resources:? 20 user accounts in Azure Active Directory (Azure AD)? Five groups in Azure AD? 10 public IP addresses? 10 network interfacesYou need to reduce the Azure costs for the company.Solution: You remove the unused public IP addresses.Does this meet the goal? A. YesB. No Answer: AExplanation: https://docs.microsoft.com/en-us/azure/advisor/advisor-cost-recommendations#reduce-costs-by-deleting-or-reconfiguring-idle-virtual-network-gateways NEW QUESTION 131**This question requires that you evaluate the underlined text to determine if it is correct. Instructions: Review the underlined text. If it makes the statement correct, select ?No change is needed?. If the statement is incorrect, select the answer choice that makes the statement correct.**A support plan solution that gives you best practice information, health status and notifications, and 24/7 access to billing information at the lowest possible cost is a **Standard**] support plan. A. No change is neededB. DeveloperC. BasicD. Premier Answer: CExplanation: https://azure.microsoft.com/en-us/support/plans/ NEW QUESTION 132You plan to deploy several Azure virtual machines. You need to ensure that the services running on the virtual machines are available if a single data center fails.Solution: You deploy the virtual machines to two or more resource groups.Does this meet the goal? A. YesB. No Answer: BExplanation: https://docs.microsoft.com/en-us/azure/virtual-machines/windows/regions-and-availability NEW QUESTION 133In which Azure support plans can you open a new support request? A. Premier and Professional Direct only.B. Premier, Professional Direct, and Standard only.C. Premier, Professional Direct, Standard, and Developer only.D. Premier, Professional Direct, Standard, Developer, and Basic. Answer: CExplanation:https://azure.microsoft.com/en-us/support/plans/ NEW QUESTION 134What is guaranteed in an Azure Service Level Agreement (SLA)? A. uptimeB. feature availabilityC. bandwidthD. performance Answer: BExplanation:https://azure.microsoft.com/en-us/support/legal/sla/summary/ NEW QUESTION 135This question requires that you evaluate the underlined text to determine if it is correct. Instructions: Review the underlined text. If it makes the statement correct, select ?No change is needed?. If the statement is incorrect, select the answer choice that makes the statement correct.An Azure service is available to all Azure customers when it is in public preview. A. No change is needed.B. private previewC. developmentD. an Enterprise Agreement (EA) subscription Answer: AExplanation: https://www.neowin.net/news/several-more-azure-services-now-available-in-private-public-preview/ NEW QUESTION 136Your company has 10 departments. The company plans to implement an Azure environment. You need to ensure that each department can use a different payment option for the Azure services it consumes. What should you create for each department? A. a reservationB. a subscriptionC. a resource groupD. a container instance Answer: B NEW QUESTION 137Your company plans to migrate to Azure. The company has several departments. All the Azure resources used by each department will be managed by a department administrator. You need to recommend an Azure deployment that provides the ability to segment Azure for the departments. The solution must minimize administrative effort. What should you include in the recommendation? A. multiple subscriptionsB. multiple Azure Active Directory (Azure AD) directoriesC. multiple regionsD. multiple resource groups Answer: A NEW QUESTION 138A company has the requirement to have an automated process in place which would upload logs to an Azure SQL database every week. Reports would then be generated from the SQL database. Which of the following would you use for this requirement? A. The AzCopy toolB. Azure Data FactoryC. Azure HDInsightD. Data Migration Assistant Answer: B Explanation:You can use the Azure Data Factory to create a pipeline that can be used to copy data. Below is an excerpt from the Microsoft documentation on the connector for SQL server.https://docs.microsoft.com/en-us/azure/data-factory/connector-sql-server NEW QUESTION 139A company is planning on deploying an application onto Azure. The application will be based on the .Net core programming language. The application would be hosted using Azure Web apps. Below is part of the various requirements for the application:? Gives the ability for the testing team to view the different components of an application and see the calls being made between the different application components? Helps business analyse how many users actually return to the application?

Ensuring IT administrators get alerts based on critical conditions being met in the applicationWhich of the following service would be best suited for fulfilling the requirement of ?Helps business analyse how many users actually return to the application?? A. Application InsightsB. Azure Service HealthC. Azure AdvisorD. Azure Policies Answer: AExplanation: https://docs.microsoft.com/en-us/azure/azure-monitor/app/usage-retention NEW QUESTION 140A company wants to deploy an application to Azure. The application has the below requirements:? Give the ability to install and provide access to the full .Net framework? Allow administrative access to the operating system? Provide a level of redundancy if an Azure region failsSolution: You decide to deploy 2 Azure Virtual Machines in 2 separate regions. And then you create a Traffic Manager ProfileDoes this solution meet the requirement? A. YesB. No Answer: AExplanation:Yes, this will meet all the requirements. Since you are using Azure Virtual Machines, IT administrators can get the required access. You can also then get the required access to the underlying software including the .Net framework. Using a Traffic Manager profile along with the failover routing policy can ensure the requirement for redundancy is fulfilled.https://docs.microsoft.com/en-us/azure/traffic-manager/traffic-manager-overview NEW QUESTION 141A team has an Azure CosmosDB account. A solution needs to be in place to generate an alert from Azure Log Analytics when a query request charge exceeds 40 units more than 10 times during a 10-minute window. Which of the following would you recommend? (Choose two.) A. Create a search query to identify when the requestCharge_s exceeds 40.B. Create a search query to identify when the requestCharge_s exceeds 10.C. Create a search query to identify when the duration_s exceeds 10.D. Configure a period of 10 and a frequency of 10. Answer: ADExplanation: https://docs.microsoft.com/en-us/azure/cosmos-db/logging NEW QUESTION 142Our team needs to deploy a Virtual machine that will host a SQL Server. The Virtual machine will have 2 data disks, one for the log file and the other for the data files. You need to recommend a caching policy for each disk. Which of the following would you recommend for the data disk containing the logs? A. NoneB. ReadOnlyC. WriteOnlyD. ReadWrite Answer: AExplanation: https://docs.microsoft.com/en-us/azure/virtual-machines/windows/sql/virtual-machines-windows-sql-performance NEW QUESTION 143A company has setup an Azure subscription and an Azure tenant. You need to provide the development team to be able to start and stop Virtual Machines. The access needs to be granted on specific occasions only. You need to ensure the permission gets assigned and use the principle of least privilege. You also need to minimize costs. Which of the following security feature would you use for the requirement? A. Conditional Access policyB. Azure PoliciesC. Just in time VM accessD. Privileged Identity Management Answer: DExplanation:With Privileged Identity Management, you can implement just in time privileges for Azure resources. https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure NEW QUESTION 144A company has deployed several applications across Windows and Linux Virtual machines in Azure. Log Analytics are being used to send the required data for alerting purposes for the Virtual Machines. You need to recommend which tables need to be queried for security related queries. Which of the following would you query for events from Windows Event Logs? A. Azure ActivityB. Azure DiagnosticsC. EventD. Syslog Answer: CExplanation: https://docs.microsoft.com/en-us/azure/azure-monitor/platform/data-sources-windows-events NEW QUESTION 145HotspotFor each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer Area

Answer:

Answer Area

Statements	Yes	No
To achieve a hybrid cloud model, a company must always migrate from a private cloud model.	○	○
A company can extend the capacity of its internal network by using the public cloud.	○	○
In a public cloud model, only guest users at your company can access the resources in the cloud.	○	○
