<https://drive.google.com/open?id=1ovlRvwPGUR03eqiyLmxn6PA3DKa0530j> NEW QUESTION 1 Your company has a Microsoft SharePoint Online subscription. The company purchases a new add-in for Microsoft Excel. You need to deploy the add-in to all users. Solution: From the App Catalog, you upload the add-in to the SharePoint Add-ins. Does this meet this goal? A. Yes B. No Answer: A Explanation: The SharePoint Add-ins catalog is a standard SharePoint asset library. Upload the add-in package to it using any of the methods of uploading files to SharePoint libraries.

QUESTION 2 You have a Microsoft 365 subscription. SharePoint administrators open several Microsoft support tickets. You need to view the status of the support tickets. Solution: From the Microsoft 365 admin center, you select Health, and then you select Message center. Does this meet the goal? A. Yes B. No Answer: B Explanation: Use the On the Service requests page, not the Service health page. On the Service requests page you can view the status of any service requests that you have filed on your clients' behalf. You can also search for them by supplying a reference number, or by the company name. Incorrect: Not A: On the Service health page you can view the aggregated health status of all services. You can click on a service, for example, Exchange, to get a list of incidents for that service, and then click on the incident number to get details at incident level.

Your company has 200 remote users who have laptops that run Windows 10. The users store files in Microsoft OneDrive for Business. You are configuring new laptops that will be deployed to the users. The new laptops have a smaller hard disk than current laptops. You need to minimize the amount of disk space used by OneDrive on the new laptops. Which Group Policy setting should you configure? A. Set the maximum percentage of upload bandwidth that OneDrive.exe uses. B. Set the default location for the OneDrive folder. C. Prevent users from synchronizing personal OneDrive accounts. D. Enable OneDrive Files On-Demand. Answer: D Explanation: OneDrive Files On-Demand helps you access all your files in OneDrive without having to download all of them and use storage space on your Windows device. When you turn on Files On-Demand, you'll see all your files in File Explorer and get new information about each file. New files created online or on another device appear as online-only files, which don't take up space on your device. When you're connected to the Internet, you'll be able to use the files like every other file on your device.

QUESTION 4 You have a Microsoft 365 subscription. You need to prevent all users except for a user named User1 from uploading video to Microsoft Stream channels and creating Stream channels. User1 must be able to create a channel and upload video to the created channel. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) A. Turn on Restrict companywide channel creation and add the Office 365 group associated to the channel as an unrestricted user. B. Add User1 to the Office 365 group associated to the channel. C. Turn on Restrict video uploads and add User1 as an unrestricted user. D.

Turn on Restrict companywide channel creation and add User1 as an unrestricted user. E. Turn on Restrict video uploads and add the Office 365 group associated to the channel as an unrestricted user. Answer: C D Explanation: By default, everyone can upload content and create companywide channels in the entire organization, however, you can restrict content creation for everyone and allow only specific individuals or security groups by turning the Restrict Microsoft Stream uploads flag ON.

<https://docs.microsoft.com/en-us/stream/restrict-uploaders> NEW QUESTION 5 You have a SharePoint farm and a Microsoft 365 subscription. You deploy the On-premises data gateway to your SharePoint Server on-premises environment. You need to configure Microsoft PowerApps to use the gateway. What should you add to PowerApps? A. a picklist B. a gateway C. a connection D. an entity Answer: C Explanation: Once you have an on-premises connection created, you can use it to create an app from data from PowerApps or start from a blank app and import the on-premises connection as a data source for your app - just like you would with any other cloud connection.
